PERSONAL SUMMARY

I am an Enthusiastic and detail-oriented Frontend developer with experience in creating responsive and interactive web applications. I am proficient in TypeScript, JavaScript, and modern web design frameworks. Adept at using React.js and Next.js for developing dynamic and user-friendly interfaces. I am committed to delivering high-quality code and excellent user experiences anytime.

EXPERIENCE

Software Engineer (Freelance)

FAPSS Lagos Nigeria

September, 2024 - present

- Converted static design files into responsive, interactive web pages using html, CSS, and JavaScript
- Enhanced website functionality and user experience by implementing responsive design techniques and optimizing for various devices
- Refined and debugged code to ensure compatibility across different browsers and improve overall performance
- Utilized git for version control, managing branches, commits, and collaborating on code reviews with peer

Junior Frontend Developer (intern)

Haven360-Lab Lagos, Nigeria

Jan. 2024 – August 2024

- Developed responsive web applications using ReactJS and TypeScript, ensuring cross-browser compatibility and mobile responsiveness.
- Collaborated and Integrated RESTful APIs to fetch dynamic data, streamlining data updates and reducing manual intervention by 30%
- Managed diverse frontend tasks, including User Interface (UI) development, performance optimization, and code review
- Developed and implemented new user interface (UI) components using React.js, which improved page load
- Debugged and resolved over 120 bugs and site issues, therefore reducing customer complaints by 45%
- Optimized CSS and JavaScript performance across multiple platforms, cutting loading times by an average of 2 seconds per page

SKILLS

- HTML
- CSS

- REACT
- NEXTJS
- REDUX
- REDUX TOOLKIT
- MUI
- SASS
- TAILWIND
- JSON

EXPERTISE

- RESPONSIVE DESIGN
- FUNCTIONAL PROGRAMMING
- ASYNCHRONOUS PROGRAMMING
- COLLABORATION
- RESEARCHING
- COMMUNICATION
- CI/CD
- AGILE METHODOLOGY
- TESTING
- CREATIVE PROBLEM-SOLVING

TOOLS & PLATFORM

- GIT
- GITHUB
- FIREBASE
- VERCEL
- MONGODB
- ...

PROJECTS

Collabofund

Collabofund is a dynamic financial management platform that empowers users to contribute funds, manage withdrawals, and track progress among contributors. I contributed significantly to the app's form functionality, developing and refining various forms for user registration and authentication. I implemented input validation with Zod, ensuring accurate and secure data handling, and enhancing user experience. Additionally, I designed the settings page, providing a seamless, intuitive layout that aligns with the app's financial management goals.

Smartparrot.ai

ParrotAI is an all-in-one social media content management app designed to simplify content creation, scheduling, task assignment, and activity tracking across multiple platforms. My contributions to this project include developing several key pages, such as the "Contact Us," "Error," and "Features" pages. I focused on creating visually engaging and user-friendly pages that align with the app's branding and provide an accessible, organized interface for users managing their social media presence.

Personal Project

Shopsy

Developed a fully responsive e-commerce website using ReactJS and TypeScript, featuring dynamic product listings and animation that impact additional user experience

Tracker

The app is an IP Address Tracker that provides users with the ability to view their own IP address and location on a map upon initial page load. Users can search for any IP address or domain to see key information and its location

Quiz App

I built a real-time quiz application that challenges users with computer-related questions, providing instant feedback and a final score summary to enhance learning and engagement.
